

SCREENPLAY JTOUCH SERIES 12 - SP9812

JTouch Series 12 Running Android 12

Technology like interactive displays in classroom environments not only makes learning more accessible but also helps dramatically improve student engagement as well. These tools are easy to use, encourage collaboration, and are flexible enough to excel in just about every environment... or at least, they should be.

The important thing to understand is that not all education-oriented interactive displays are created equally. Thankfully, one separates itself from the pack in the best possible way: the recently released ScreenPlay JTouch Series 12, an example of the best that modern IT can be that truly has something to offer both educators and their students alike.

Meet the ScreenPlay JTouch Series 12: A Modern Screen For Modern Needs

All it takes is a quick look at the technical specifications of the JTouch Series 12 to see just what a flexible product line this truly is. It's available in not one but five screen sizes, presenting an ideal solution for classrooms both large and small:

- 55"
- 65"

- 75"
- 86"
- 98"

So whether you're looking for a solution that is perfect for a small, intimate high school class, a large college lecture hall, or somewhere in the middle, you've got it.

The major difference between the models has to do with maximum brightness. While the 55" through the 75" can hit an impressive 450 cd/m², the 86" and 98" units go all the way up to 500 cd/m². This makes those larger units perfect for brighter environments that tend to have a lot of natural lighting.

All screen sizes come complete with a D-LED backlight with native 4K resolution at 3840 by 2160 pixels. They're in the 16:9 aspect ratio commonly found on most consumer-grade television sets these days. They also sport a static contrast ratio of 1200:1 and a dynamic contrast ratio of 4000:1, allowing them to capably and accurately display everything from videos to slideshows and presentations without an issue.

But perhaps one of the most important features of all ties directly into the ScreenPlay's durability. When a product is designed to be used in an educational environment, it needs to be able to stand up to just about anything. Not only does it have to be mobile (and thus resistant to dings, falls, and other issues), but you never know what might happen. That's why the frame material has been constructed from a rugged, high-quality aluminum alloy material – the perfect choice for making sure you get the longest lifespan possible out of the unit.

Connectivity is King

If an interactive display is only as impressive as the content you can play on it, know that the JTouch Series 12 also has this particular element covered. It has an impressive array of inputs, including like:

- VGA (Mini D-sub 15-pin connection)
- HDMI 2.0 with ARC/CEC compatibility (x2)
- USB 3.0
- USB-B (x2)
- 3.5mm Stereo Mini Jack
- USB Type C

Those HDMI inputs allow you to effortlessly connect the ScreenPlay to most modern-day source devices like DVD players, Blu-ray players, and even computers. ARC/CEC functionality streamlines the process, allowing you to use a single remote to control everything (among other benefits). When connected via HDMI, both audio and video are handled over the same cable, so you don't have to worry about finding multiple plugs or creating a potential tripping hazard.

As far as outputs are concerned, there is a 3.5mm Stereo Mini Jack and an SPDIF output.

But in the modern era, most content will be sent to your interactive display via either an internal network or from the Internet. Not only does the ScreenPlay offer the network connectivity you need to meet the demands of today, but it also prepares you for the needs of tomorrow as well with connections like:

- Built-in Wi-Fi 5G Hotspot (x2)
- RJ45 – LAN 10/100 Ethernet Connection (x2)
- RS232 Connection

So it doesn't matter where your content is coming from or how quickly you need to get it ready for students – you'll be able to get the results you need without requiring an advanced computer networking degree in order to do it.

Where Innovation Meets Ingenuity

For as impressive as the base features on the ScreenPlay are, a number of functions are included that allow it to go above and beyond similar products of this category. One of the most notable has to do with the built-in temperature sensor – invaluable for allowing the JTouch Series 12 to function at peak efficiency in virtually any environment.

Regarding connectivity, all units not only feature USB Type C port but also NFC (Near Field Communication) wireless technology as well. This is in addition to all the other options for connectivity outlined above. Regardless of the source device you're using or how limited your resources are, you'll always be able to connect directly to your JTouch Series 12 unit to display the content you need as effortlessly as possible.

The embedded system itself is also just as impressive as the larger display technology. The CPU, for example, is a highly capable ARM Cortex Octa Core A55 1.4Ghz unit that, when paired with the ARM Mail Quad Core G52 600 MHz GPU, means that there is very little you can throw at the JTouch Series 12 that it won't be able to play effortlessly.

Note that the base configuration also comes with 8GB DDR4 RAM and 128GB of EMMC ROM, although optional upgrades are available (see more information below).

Optional Upgrades and More

Note that there are also a number of optional upgrades that educators can choose to take advantage of depending on their precise needs. In addition to the ScreenPlay unit itself in any of the aforementioned sizes, you can choose to include a OPS Slot-In PC utilising the connector built in to each display. Three options are available, Intel i5 and i7 processors with Windows 11 Pro operating system, as well as a Google EDLA certified Android 13.8..

Being Google certified means that the display offers seamless integration with the Google ecosystem, including Google Workspace (formerly G Suite for Education) and the entire Microsoft 365 suite. Teachers can easily access their Google accounts, files, and collaborative tools directly from any of the ScreenPlay JTouch 12 Displays when utilising the optional SPOPS3 (Google EDLA Certified Android 13.8 OPS).

The ScreenPlay JTouch Series 12 is now available to order with all the aforementioned features.

Features & Benefits

ANNOTATION OVER ANY SOURCE

Any file you have stored on any of your ScreenPlay JTouch 12 can be annotated over even documents stored on an attached OPS when working in Android on the display. Super functional and handy when reviewing documents as a team or commenting on curriculum content in the classroom.

NFC (NEAR FIELD COMMUNICATION)

Private content is securely held on the device and can only be accessed with the appropriate keycard via NFC.

WINDOWS 11 PRO & GOOGLE ANDROID 13.8 EDLA CERTIFIED OPS

Three options are available, Intel i5 and i7 processors with Windows 11 Pro operating system, as well as a Google EDLA certified Android 13.8. Being Google certified means that the display offers seamless integration with the Google ecosystem, including Google Workspace (formerly G Suite for Education) and the entire Microsoft 365 suite. Teachers can easily access their Google accounts, files, and collaborative tools directly from ScreenPlay JTouch 12 Displays (65-98") when utilising the optional SPOPS3 (Google EDLA Certified Android 13.8 OPS)

USB-C A SINGLE CABLE SOLUTION

Easily connect USB-C devices through the 12 series's USB-C port with up to 45-watt power delivery. USB-C supports video, audio, touch, data, and power output for charging laptop devices quickly over a single cable.

OCTA-CORE PROCESSING

The ScreenPlay JTouch Series 12 CPU is a highly capable ARM Cortex Octa Core A55 1.4Ghz unit that is paired with the ARM Mali Quad Core G52 600 MHz GPU. A powerful combination!

MEMORY CAPACITY UPGRADE

8GB DDR4 RAM and 128GB of EMMC ROM as standard on all ScreenPlay JTouch Series 12

OPTOMISED TEMPERATURE AND ENERGY CONTROL

The JTouch Series 12 Temperature Sensor can monitor the temperature of your workspace or classroom and trigger alerts when rooms needs to be ventilated.

Display

Product Series	ScreenPlay JTouch Series 12
Screen Size (Diagonal)	98"
Backlight	D-LED
Native Resolution	4K 3840 × 2160
Aspect Ratio	16:9
Contrast Ratio	1200:1
Dynamic Contrast Ratio	4000:1
Brightness (Maximum cd/m2)	500
Response Time (ms)	8
Display Colours (billion)	1.07
Refrate (Hz)	60
Viewing Angle (H-V°)	178 / 178
Glass Treatment (mohs)	Antiglare, 7
Sensors	Temperature
Audio (w)	2 × 15
Lifetime Maximum (hrs)	50000
Frame Material	Aluminium Alloy
Supported Orientation	Landscape

Connectivity

Inputs	1x Mini D-sub 15-pin (VGA), 1x HDMI™ 2.0, 2x HDMI™ 2.0 ARC/CEC, 1x USB-A 2.0, 3x USB-A 3.0, 2x USB-B, 1× 3.5 mm Stereo Mini Jack, 1x USB Type C, 1x NFC
--------	---

Outputs	1× 3.5 mm Stereo Mini Jack, 1x SPDIF
Networking & Control	2x Built-In Wi-Fi (5G) /Hotspot (5G), 1x RJ45 - LAN 10/100, 1x RS232
Expansion	1x Open Pluggable Specification (OPS) Slot, 1x TF Card Slot up to 128GB

Power

Power Supply (V / Hz)	AC 100 - 240, 50/60
Power Consumption Minimum [W]	198
Power Consumption Minimum with OPS [W]	211
Power Supply - Maximum (W)	660
Power Consumption Network Standby (W)	<2.0
Power Consumption Standby (W)	<0.5

Touch System

Touch Technology	IR
Touch Points Maximum	32 Android, 50 Windows
Typical Response Time (ms)	<6
Accuracy (mm)	1
Minimum Object Size Single Touch (mm)	>3
Minimum Object Size Multi Touch (mm)	>8
Supported Operating Systems	Windows, Linux, Mac OS, Chrome

Embedded System

Operating System & Version	Android 12
System on Chip (SoC)	V100

Central Processing Unit (CPU)	ARM Cortex™ Octa Core A55 1.4Ghz, A55 ×8
Graphics Processing Unit (GPU)	ARM Mail Quad Core G52 600 MHz, G52 ×4
Random Access Memory (RAM) GB DDR4	8
Read Only Memory (ROM) GB EMMC	128
Included Applications	Browser, WPS, Calendar, Calculator, Easy Upload, Gallery, Timer, Airgo Cast, VoteKit, Camera, File Manager, Screen Record, Whiteboard, Welcome,
Bluetooth	5.0

Optional Upgrades

SPOPS1	SCREENPLAY, OPS SLOT-IN PC, D001, INTEL I5-11400, 16GB/512GB SSD, SPOPS1
SPOPS2	SCREENPLAY, OPS SLOT-IN PC, INTEL® CORE™ i7-11700, 16GB 512GB SSD, SPOPS2
SPOPS3	SCREENPLAY, OPS SLOT-IN PC, EDLA 8GB, 128GB, SPOPS3

General

Product Dimensions (L x W x H) (mm / in)	2216 × 109 × 1317 / 87.2 × 4.3 × 51.9
Product Weight (kg / lb)	104 / 229
Shipping Dimensions (L x W x H) (mm / in)	2483 × 376 × 1493 / 97.8 × 14.8 × 58.8
Shipping Weight (kg / lb)	134 / 295
Mounting VESA MIS-F	400 × 1000
Operating Temperature (°C / F)	0 ~ 40 / 32 ~ 104
Operating Humidity [%]	10 ~ 90
Operating Altitude (m / ft)	<5000 / >16404
Storage Temperature (°C / F)	-20 ~ 40 / -4 ~104
Storage Humidity [%]	10 ~ 90
Security	NFC Profiles, PIN, Kensington Lock

Safety and Regulatory	CB, CE EMC, IC, FCC, UL, NOM,
Environmental	RoHS, WEEE, EU Energy
In the Box	Interactive Display, Simplified Users Guide, VGA Cable, Regional Power Cord, Remote Control (no Battery), USB Cable, Wall Mount
